PROFESSIONAL SUMMARY

Infrastructure and cloud-focused engineer with hands-on experience in secure systems deployment, endpoint security evaluation, and backend development. Skilled in configuring Linux/Windows server environments, SSH hardening, Docker-based deployments, and SIEM monitoring with Wazuh. Self-directed home lab practitioner with experience in VMware virtualization, OpenVPN, and network infrastructure management. Targeting AWS Cloud Support and Infrastructure Engineer roles where practical, security-conscious systems thinking drives real impact.

EXPERIENCE

Systems R&D Intern | Winman software India LLP

Feb 2026 – May 2026

- Architected a secure self-hosted Git server with separate SSH-key-based access for read-only and read/write users, improving repository security and access management.
- Researched and compared endpoint security solutions including Sophos, CrowdStrike, and Trend Micro based on Gartner reports and organizational security requirements.
- Implemented WSUS for Windows update management, ensuring all systems are up-to-date with the latest security patches.
- Coordinated with Sophos Central and vendor teams to configure and validate endpoint security deployment strategies.
- Conducted testing on both lab or testing systems and production user devices to identify real-world performance and compatibility gaps.
- Assisted in endpoint security assessment and solution finalization to improve organizational security and system reliability
- Hardened the Git server by configuring “sshd_config” to restrict domain users to Git-only operations through a CMD/PowerShell wrapper, preventing unauthorized command execution.
- Set up secure OpenSSH connectivity between Linux servers and Windows clients to support cross-platform automation workflows developed by the automation team, improving remote task execution and operational efficiency.
- Deployed and troubleshot “chatwoot” for the sales team by validating webhook integrations and finalizing a Docker-based production deployment, improving customer communication and workflow management.
- Configured email notifications in “GLPI” and “Wazuh” based on organizational requirements to improve monitoring and incident response.

EDUCATION

Pre-University Education / XII (PCM-CS) – 94.67%

Nov 2020 – Mar 2022

Jawaharlal Nehru New College of Engineering.

B.E. in Computer science and Engineering – 9.32/10 CGPA

Nov 2022 – Aug 2026

Jawaharlal Nehru New College of Engineering.

SKILLS

- **Cloud & Infrastructure:** AWS (EC2, S3, VPC - self-study), Docker, OpenVPN, Nginx, VMware workstation
- **Security & Monitoring:** Wazuh SIEM, OpenSSH, endpoint security (Sophos), OAuth 2.0, JWT, RSA Auth
- **System Administration:** GLPI, Linux (Ubuntu 24.04 LTS), Windows Server 2022, Git.
- **Backend & Databases:** Python, Django, DRF, Celery, PostgreSQL, Redis, REST APIs
- **Soft skills:** Attention to detail, Teamwork, Time management.
- **Languages:** Kannada (Fluent), English (Professional), Hindi (Conversational).

PROJECTS

Multi-VM Infrastructure Lab - VMware Workstation on Windows 11 Host

Jun 2026 – Present

- Running Ubuntu 24.04 LTS (headless, static IP, NAT) and Ubuntu Desktop VMs
- Deployed full Wazuh SIEM stack (Manager, Indexer, Dashboard v4.9) on Ubuntu VM, actively monitoring a Windows host agent for security events and log analysis.
- Deployed live Django + PostgreSQL 17 + Redis + Daphne (ASGI) backend stack on Ubuntu VM with Nginx configured as reverse proxy to listen on port 9000 and forwarding to daphne port 8000

Hyper Dev – A Freelance and Work Management Platform

Jun 2024 - Aug 2025

- Developed a freelance and workforce management platform for remote collaboration between clients and developers.
- Implemented secure OAuth, two-step verification, and RSA-based authentication to enhance platform security.
- Built a dynamic admin URL system to reduce unauthorized admin access attempts.
- Designed role-based access control and notification systems for streamlined user management and communication.
- Developed job board, workforce management, and team collaboration features to improve hiring and project coordination.
- Integrated real-time private/team chat and article publishing features to improve collaboration and content sharing.
- Implemented sentiment-based project rating using “textblob” for improved open-source project feedback analysis.
